

Contaminants of Emerging Concern (CEC) In Water Bodies

Date: 26 May 2022, Thursday

Time: 0930 – 1630 MYT

Platform: Zoom

The growing presence of contaminants of emerging concern (CECs) in water pose an increased risk on aquatic life and human health. Join this webinar as our panel of industry experts share what CECs are and its impact as well as engage in discussions on what can be done to mitigate this pressing challenge in bid to improve the quality of our water.
