Fastman

Fastman
With the Content Suite Platform being the single point of truth for all your unstructured content, managing information access and maintaining integrity is a top priority.

OpenText Permissions Manager by Fastman

Permissions Manager is the most complete permissions and access management solution for OpenText Content Suite and xECM.

It simplifies management of Content Suite access controls, reduces the risk of information leaks, and enables sound internal information controls.

Assists organizations to comply with CA Consumer Privacy Act, (CCPA), GDPR, and similar legislation.

OpenText Cloud – Permissions Manager

- **Value for OT Cloud Users**
  - Streamline user onboarding and granting access
  - Ensure security model is compliant with organizational policy
  - Allow configuration of business settings by Business Administrators
  - Advanced support for working with Roles on Business / Connected Workspaces
  - Alleviate need for ad-hoc reporting and development

opentext™ | Cloud Certified

The Issue

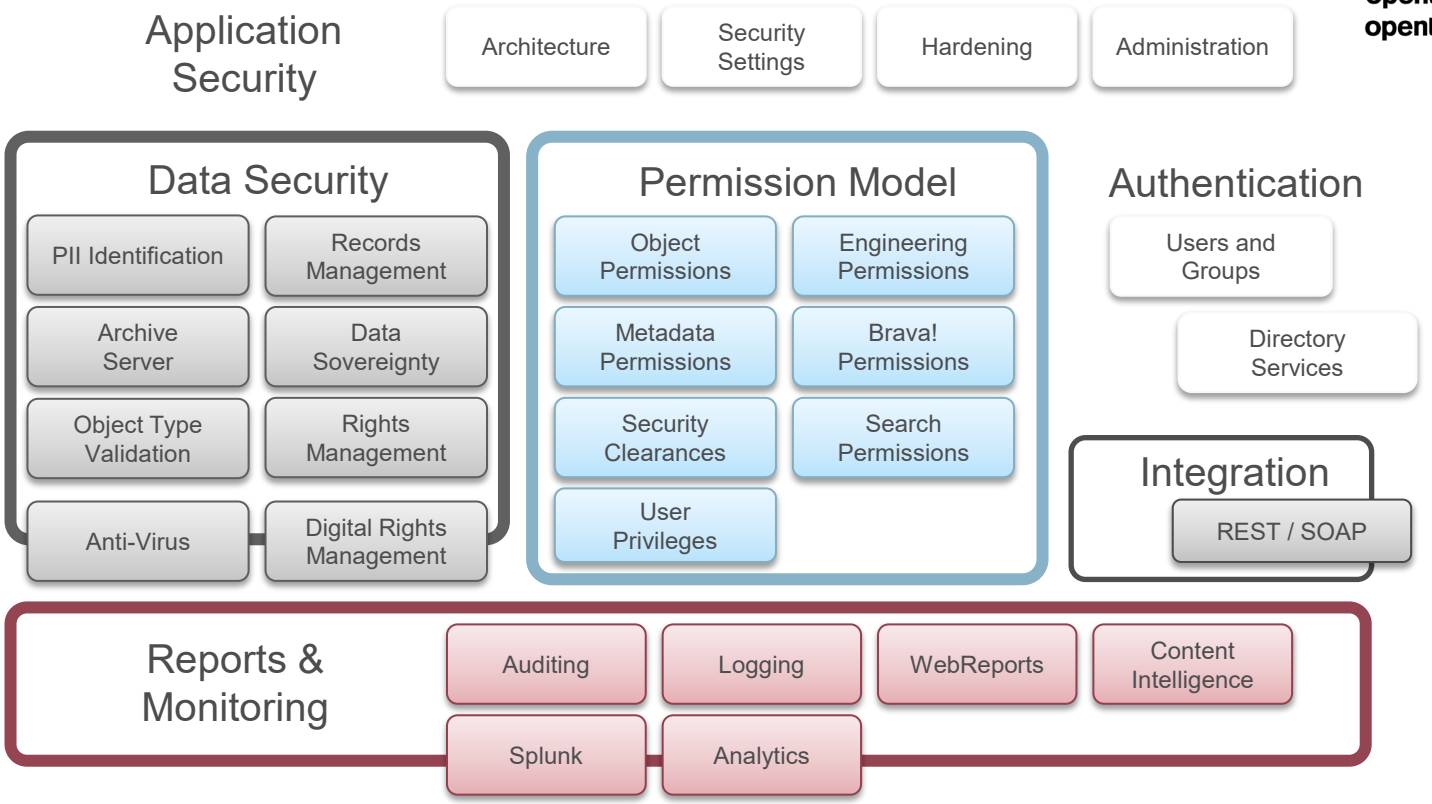
Content Suite / Extended ECM has very powerful access and security capabilities

But…

- ***It is not transparent***
- ***Costs of maintaining it can be high***
- ***Policy can be hard to enforce***
- ***Risk of non-compliance remains***

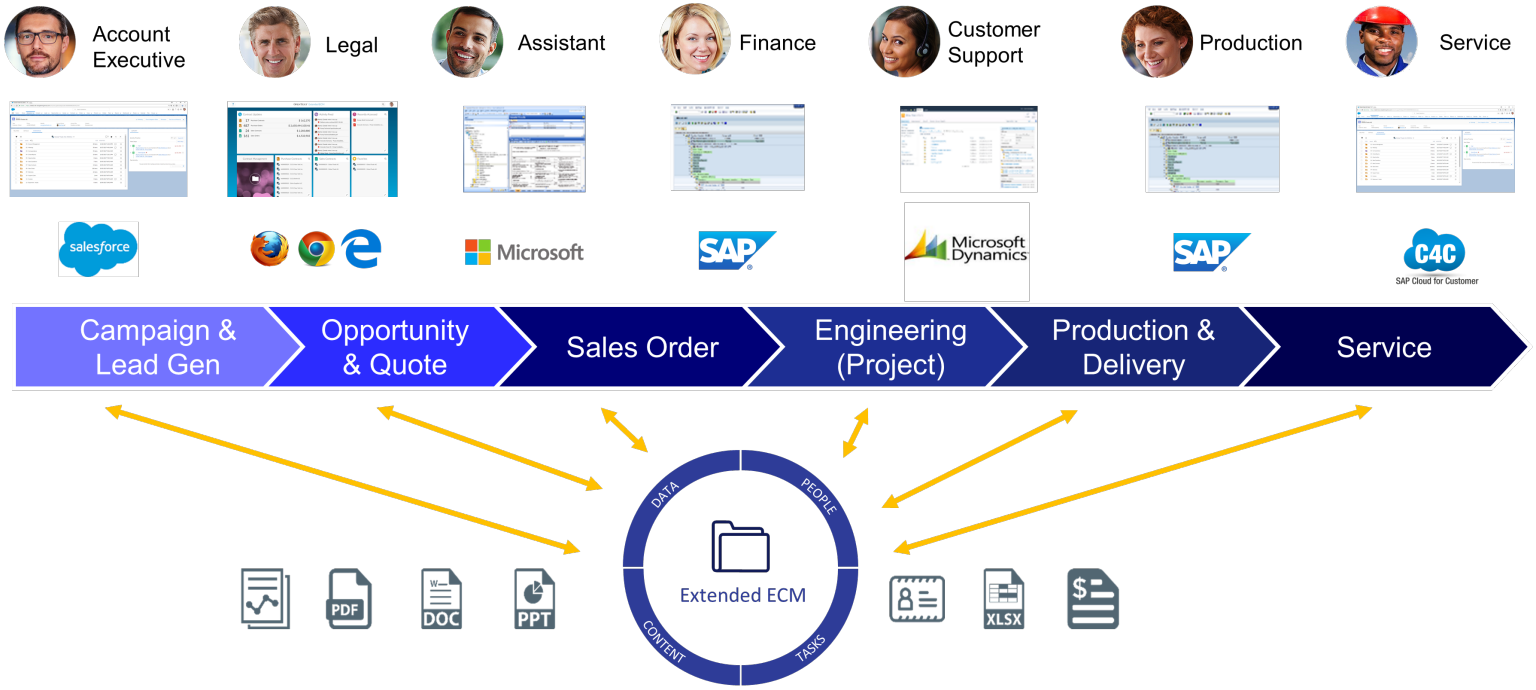
Security and Permissions in OTCS is complex!

opentext™ | Content Suite
opentext™ | Extended ECM

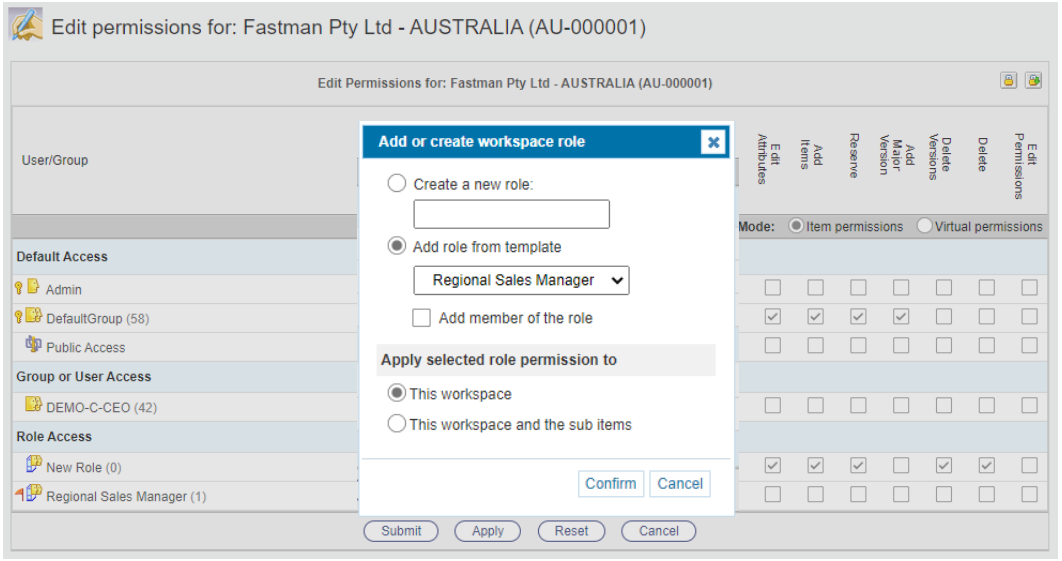


Fastman

And is becoming more complex!



With Roles, Access Gets more complicated, not less



- Role Based Permissions
  - Central to Workspace model
  - Works alongside ‘classic’ permissions
  - Has it’s own considerations
  - Permissions Manager increasingly relevant

OpenText Permissions Manager by Fastman

- Permissions Manager is used
  - In 20+ countries
  - By Fortune 100 Companies, SME's, National and Regional Govt
  - Across all verticals
  - By new and well-established OpenText customers
  - On OTCS 10.5 – 21.1 and xECM
- Launch Customer in Australia
  - Purchased 2008 and still using it!

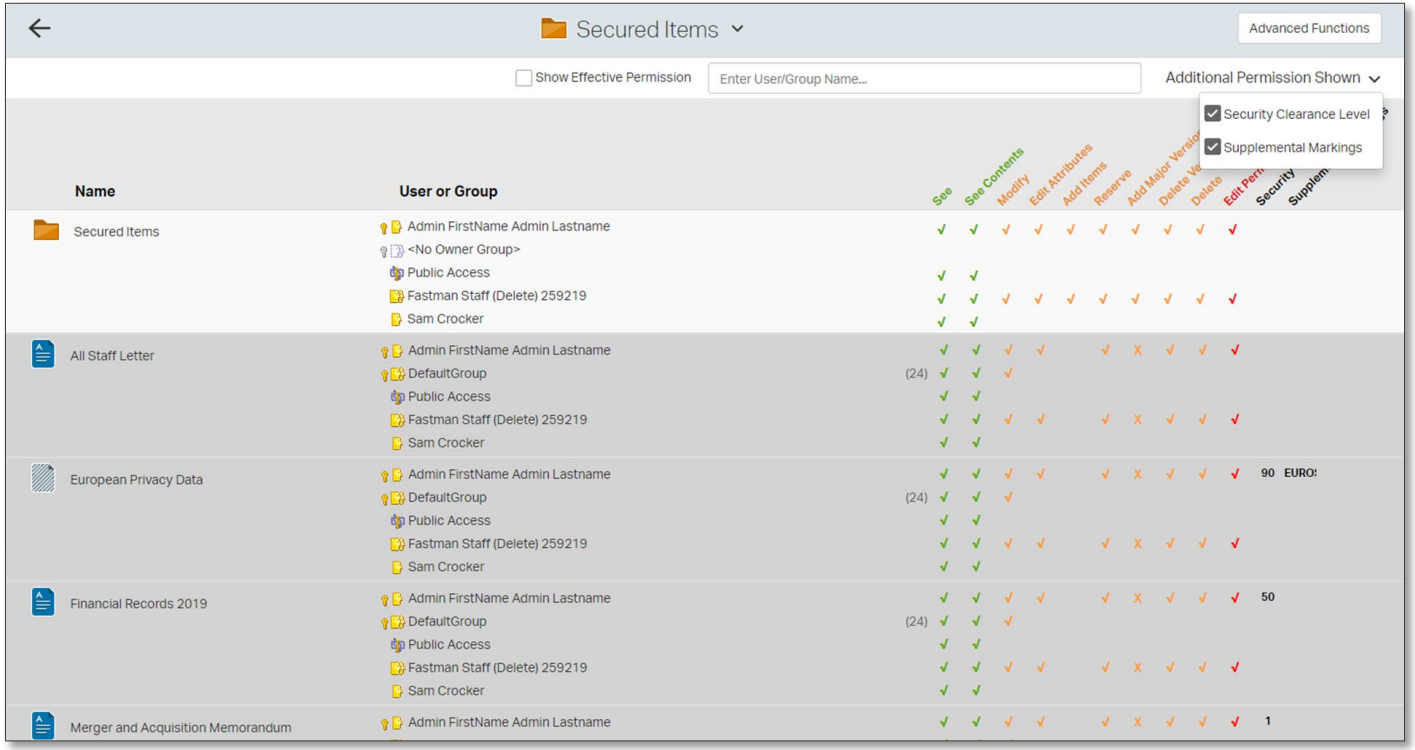
opentext™ | SolEx Partner Gold

Fastman

Proven Leading Solution

- Rich collection of functions targeting Key Use Cases
  - “I need to see what permissions are in place”
  - “I need to make changes to permissions and access – a lot, and quickly”
  - “I need to manage the system and risk”
- Fully complies with and respects underlying system rules and policies

Interactive Smart UI and Classic UI Dashboards



New Features – 21.2 and 21.3*

- **Extended support for role-based access**
  - As more organizations move to business workspaces and xECM, this capability becomes invaluable.
    - Ability to Add/Remove/Rename roles while editing permissions on a workspace
    - Create New Roles for folders and hierarchies without leaving the main permissions window
    - Select ready-to-go roles on the workspace you are working within
    - Remove or rename a Role from one of multiple workspaces
- **Extended support for Cloud Deployments**
  - Business Administration support
  - Improved self-service
  - Containerized deployments

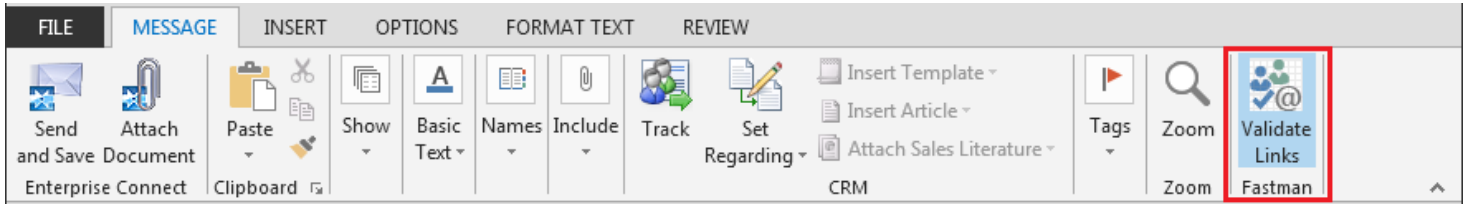
Fastman

*Fastman versions now aligned with OpenText releases

Fastman Permissions Manager for Outlook

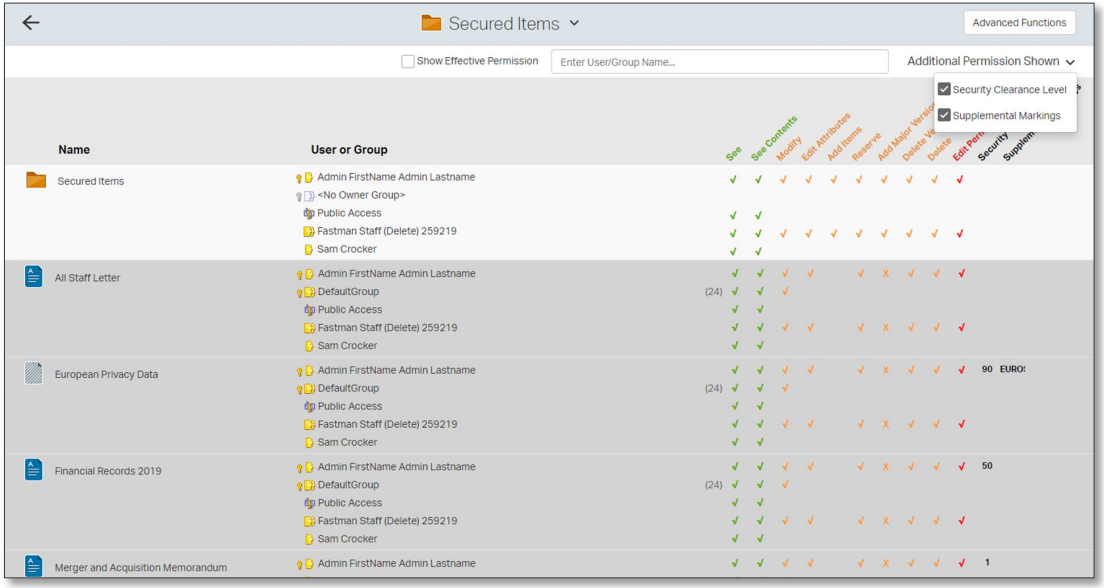
- Integration with Microsoft Outlook
- Validate recipients have access to Content Server linked documents
- “Add-on” for Fastman Permissions Manager.
- Validate access based on the effective permissions recipients have on the linked object(s)
- Permissions granted by group, role and direct access are all considered



Quick Product Refresher and New Features Demo

Which Takes us Back to..

To ensure information is secure, users are not disenfranchised, and costs are contained



You need a comprehensive and proven tool built for purpose

Fastman

The Bottom Line

Fastman Permissions Manager remains the leading product to meet the Access and Permissions challenge for OpenText Content Server and Extended ECM

Increases its effectiveness as a risk and compliance platform

Increases ROI, lowers deployment and support costs
